

Career Technical Education (CTE) is a proven strategy that expands options for learners, empowers them to choose a meaningful and sustainable career, and prepares them with real-world skills for success in college and careers. Through hands-on learning, engagement with industry experts and rigorous academic and career-focused coursework, CTE is learning that works for California’s students – and its economy.

CTE Works for Learners in California

CTE Enrollment¹

772,350

Outcomes for Learners in California⁴

93%

high school CTE graduates enrolling in college, enlisting in the military or working within six months

90%

postsecondary CTE students staying enrolled and/or transferring

88%

postsecondary CTE students earning a credential, certificate or degree

78%

postsecondary CTE graduates placed in careers or further training within six months

- Fun fact: California has invested about \$1.4 billion in regional career pathways since 2013 through the California Career Pathways Trust, CTE Incentive Grants, the Strong Workforce Grant Program and other initiatives.⁵
- Fun fact: Students in the California Partnership Academies are more likely to pass high school exit exams, meet college entrance requirements and graduate from high school than their peers.⁶

CTE Works for California’s Economy

- Middle-skill jobs – those requiring some postsecondary education and training, but not a Bachelor’s degree – account for 50 percent of California’s labor market.
- However, only 39 percent of workers in California are qualified to fill these middle-skill jobs,⁸ leading to a skills gap that CTE can help address.
- In total, 263,076 associate’s degrees or certificates were awarded in California in 2015 – about 47 percent of all postsecondary degrees and certificates.⁹

In California, the top middle-skill occupations with the highest projected job openings are in the Health Science Career Cluster.⁷
