## Program Information

# Climate Kids

Join us for a fun day of learning.

The Climate Kids Program is perfect for all grade levels. It is a wonderful way for kids to learn about the vast expanse where land meets sea, supporting a thriving body of marine organisms and how they have adapted to live under the harsh environmental pressures.

During this two hour program, students will rotate between a Ranger-Led program that explores how Cabrillo scientists investigate climate change and a whiteboard learning session to explore Ocean Acidification and the Ocean Regulator.
